GAME MANUAL

MOVEMENT

You can use either A or D key to move the firefighter, and use the spacebar to jump.

A: Left
D: Right
P: Pause
Q: Quit

ATTACK

Be cautious of the fireballs!

You will lose health if you go near them. Be sure to attack them by clicking the right or the left mouse button depending on the direction you are facing.

GOAL

You win if you are able to rescue the person somewhere inside the burning building, and take them to safety (which is outside the house!).

HELP

You lose if you die !!

EXTERNAL TOOL

The external tool allows you to change the color of the enemy fireballs.

1. Open the tool using Visual Studio 2017.
2. Choose a color from the options provided, and click the save button.
3. A text file named "Color" containing the name of color you choose will be saved to the debug folder of the external tool.
4. Move the text file to the debug folder of the main game: FireExtinguisher.
   File path to FireExtinguisher's debug folder: E:\FireExtinguisher\bin\DesktopGL\AnyCPU\Debug
